FreeSCADA

2.0.0.8 is out. It includes the following improvements:

- Remote access to data channels by HTTP protocol
- Improved error handling and a number of other bugfixes
- New Chart control to show channel trends in real-time
- New ToggleButton control which acts like a checkbox, but has button look and feel
- TextBox control with possibility to bind its value to data channels
- "check for updates" command was added

You can get it from SF download page. Please note that FreeSCADA now requires Service Pack 1 for .Net Framework 3.5.
