Last Updated Tuesday, 29 September 2009

Here is small update of FreeSCADA. There are two critical fixes:

- Fix for the issue of retrieving big number of variables from CLServer reported by Seung Woo Lee.

- Added command for Schema renaming and removing. This functionality was overlooked

in previous

releases. Thanks to Artur_K for pointing that.

You can get it from SF download page.

We are waiting for your comments on our new Forum.
Give it a try! :)
